

Harmonization with Regulation (EC) No 1907/2006 (REACH)

as well as the list of dangerous substances (SVHC)

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European regulation that has been in force since 1 June 2007 and it concerns the registration, evaluation, licensing and restrictions of chemicals.

AKRITAS, understanding its obligations and commitments deriving from the regulation, declares that for the following products:

- ❖ Particleboard AKRIPAN®
- ❖ Particleboard HYDROPAN®
- ❖ Particleboard coated with a decorative melamine surface
- ❖ Semi-finished products POLYTHETA®

registration or pre-registration with REACH is not required, though it provides any information regarding the SVHC (Substances of Very High Concern) contained in its products.

According to the SVHC list and Annexes 14 and 17, substances contained in a concentration greater than 0.1% (w/w) are required to be declared to REACH. AKRITAS states that none of the substances contained in its products exceed the aforementioned limits.

Finally, regarding the raw materials used for the production process, AKRITAS controls the harmonization of its suppliers with the provisions of the above-mentioned European regulation.
