

Attestation

E1-795

Herewith it is confirmed that in the first half of 2022, performed on 25.05.2022, a regular supervision of the product

AKRIPAN

particleboard, pine and beech, UF + MUF, unfaced
in the thickness range: ≤ 40 mm

manufactured by

AKRITAS S.A.
GR 68400
Provaton Soufliou
Greece

was carried out by the approved supervision body (NDS08)

Fraunhofer Institute for Wood Research

Wilhelm-Klauditz-Institut WKI
Bienroder Weg 54E, 38108 Braunschweig, Germany

according to supervision contract no. 795 dated May 31, 2010. It was found that the requirements on personal and equipment are suitable to produce the product in an adequate way and the factory production control meets the requirements of the "Regulation on the classification and external supervision of wood-based panels regarding formaldehyde emission (DIBt - Guideline 100)" dated June 1994. This attestation is part of the evaluation report. The continuous external supervision of factory production control shall take place twice a year.

Dipl.-Ing. Harald Schwab

Head of the Testing, Supervision
and Certifying Body

Braunschweig, October 20, 2022
